

Major changes in the WACOMA modules as a result of the COVID-19 state of alarm:

Module title: 2374202_19_20_01 BIOAVAILABILITY AND BIOACCUMULATION: KEYS FOR THE QUALITY OF ECOSYSTEMS

Lecturer(s) full name(s): Miriam Hampel y Julián Blasco Moreno

Chosen online teaching method(s): Upload of presentations and additional reading, written indications for the presentation.

Major changes in the evaluation method with respect to official planning as a direct consequence of the state of alarm (*): Minor.

The students initially were supposed to perform a critical review of a related scientific paper to be presented the last day of classes. They were asked to do this review and present it in a written document, and an extensive questionnaire was elaborated for the students to fill it in and submit through the virtual campus for additional evaluation.
