Major changes in the WACOMA modules as a result of the COVID-19 state of alarm:

Module title:

Coastal & marine areas: managing complex systems

Lecturer(s) full name(s):

Javier García Sanabria

Chosen online teaching method(s):

The online teaching method will be **BigBlueButton** (a link to the online lessons will be published in the virtual campus)

Major changes in the evaluation method with respect to official planning as a direct consequence of the state of alarm (*):

The evaluation method will be the same, but the students will have to present and defend their works through the virtual campus (BigBlueButton). To this end, the role of moderator will be given to every student so they can share their screens while presenting.

The evaluation method:

1. Attendance and participation in theoretical and practical lessons

The attendance and participation will be through the BigBlueButton tool.

2. Exhibitions and / or defenses of exercises, themes and works

The exercises and final work will be presented by the students through BigBlueButton, and some of the exercises will be sent by the students through the email.
