

## **Major changes in the WACOMA modules as a result of the COVID-19 state of alarm:**

**Module title: Coastal Flooding Hazards**

**Lecturer(s) full name(s): Laura del Río Rodríguez**

**Chosen online teaching method(s):**

- Upload of classroom slides and practical exercises
- Upload of complementary material (videos, documents, websites)
- Big Blue Button meetings for explaining the exercises
- Online chats for solving questions
- Specific forum on each lesson for solving questions

**Major changes in the evaluation method with respect to official planning as a direct consequence of the state of alarm (\*):**

[\(https://ccmaryambientales.uca.es/modules-description/\)](https://ccmaryambientales.uca.es/modules-description/)

The official evaluation method is based on two items that must be uploaded by each student to the Campus Virtual:

- Written report on the practical exercises done in classroom (30%).
- Individual oral presentation based on bibliographic research on one specific topic related to module contents (70%)

The only change regards the second item, as the oral component will not be evaluated (only the presentation file will be assessed).

**Signed by:**

(\* ) NOTE: If you have not introduced major changes in the evaluation method, simply write "none".
