

Major changes in the WACOMA modules as a result of the COVID-19 state of alarm:

Module title: 2374201_19_20_01 ECOTOXICITY TESTS IN RISK ASSESSMENT

Lecturer(s) full name(s): Miriam Hampel

Chosen online teaching method(s): On-line presentation and upload of presentations and additional reading

Major changes in the evaluation method with respect to official planning as a direct consequence of the state of alarm (*): None.

The students initially were supposed to perform an environmental risk assessment of a contaminant and site of their choice, and present their work the last day of the module. This presentation is now not in person but they send it with a describing document or an audio.
