

Major changes in the WACOMA modules as a result of the COVID-19 state of alarm:

Module title: Hydro-meteorological hazards and risks at coastal zones

Lecturer(s) full name(s): Óscar Manuel Ferreira

Chosen online teaching method(s): ZOOM. Note: The students will need to have access to a computer with Excel and Google Earth Pro installed.

Major changes in the evaluation method with respect to official planning as a direct consequence of the state of alarm (*): No major change. The exam is with consultation. The only potential issue is if the students live together since in that case it is easy to do a “joint work”. Nevertheless, in this type of exam it is almost impossible that individual works have the same parameters, values, tables, criteria, etc., and thus works made together are easy to detect.
