

## Major changes in the WACOMA modules as a result of the COVID-19 state of alarm:

**Module title:**

Quarrying and mining activities impacts on water quality (Block 3; Module 6)

**Lecturer(s) full name(s):**

María Dolores Basallote Sánchez

Carlos Ruiz Cánovas

**Chosen online teaching method(s):**

Teleconferences – Big Blue Button (Campus Virtual UCA)

**Major changes in the evaluation method with respect to official planning as a direct consequence of the state of alarm (\*):**

[\(https://ccmaryambientales.uca.es/modules-description/\)](https://ccmaryambientales.uca.es/modules-description/)

The programmed fieldtrip to the Odiel and Tinto rivers basin would be replaced by a detailed Virtual Guide showing the main field sites that the lecturers will present as teleconference class to the students. In the official planning, the students are required to present a Fieldtrip written report based on the field excursion. To adapt the initial module planning to the actual non-presential lectures because the state of alarm, the students are required to present the results of the exercises explained in class as part of the evaluation method, instead of the fieldtrip report.
