

DESIGN AND IMPLEMENTATION OF OCEANOGRAPHIC CAMPAIGNS

Credits: 5,0 ECTS

Brief description of contents:

- Design of oceanographic campaign: physical, chemical, biological and geological aspects
- Execution of oceanographic campaign
- Writing of report about oceanographic campaign
- Operation of machines, acquisition of oceanographic data from the water column and the substrate, related to physical, chemical, biological and geological aspects (practical classes)
- Preparation of reagents for chemical, biological and geological analyses (practical classes)
- Laboratory analysis of preserved samples (practical classes)

Evaluation system:

SYSTEM	WEIGHT
Written projects and reports	30 – 50
Presentation of exercises, topics and projects	20 – 40
Attitude during practical classes and oceanographic campaigns	20 – 40
